DETAILED ACTION

This is in response to amendments filed on 5/2/07 in which claims 1, 3-5 and 7-24 are pending. The applicant's amendments have been fully considered therefore this case is in condition for allowance. In addition the pending claims have been renumbered as 1-22 respectively.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior arts of record fail to anticipate or render obvious the following recited features: an encoder for carrying out a negation and conjugation operation of two symbols from among the four symbols containing the two phase-rotated each time interval, and for transferring the four symbols after the negation and conjugation operations to the transmitting antennas as recited in claim 1. First and second decoders each producing metric values associated with all possible symbol sub-combinations using the channel gains and the signals received by the symbol arranger and detecting two symbols having a minimum metric value among all the possible symbol sub-combinations, each of the symbol sub-combinations containing all possible two symbols as recited in claims 10 and 21. Generating a new four by four matrix by carrying out a negation and a conjugation operation of at least one element among elements of the selected four by four matrix; and sequentially selecting one column of the new four by four matrix during each time I
